Truckload Shipping

When you need to make a larger shipment, Estes is committed to providing you with the capacity, flexibility, and resources you need to keep your freight moving. Our asset-based truckload service allows you to ship full loads—weighing at least 45,000 pounds or taking up at least 48 linear feet of trailer space—with one of the industry’s most trusted and reliable carriers.

With Estes, you can enjoy the many benefits of truckload shipping:

- » Lower costs per pound than LTL
- » Minimized freight handling
- » Over-the-road and intermodal service

And our backhaul service takes advantage of Estes trucks that are traveling home without a full load. That means if we have extra space, you can ship for less.
